# ABOUT

**Daniels of Wetherby is a well established business, being a part of Wetherby for over 30 years.**

Dusty started working there in 2002 and built up a busy client base. She left in 2005 to gain more experience in the beauty industry. She joined the cruise ship world! Travelling the Caribbean and Europe and working with people from all over the world in a 5 star spa, gave her a fantastic experience and now able to offer the highest standard of service and customer care to clients today.

Having a great relationship with the previous owners and deciding she wanted to undertake a business creating Daniels of Wetherby by Dusty seemed the most natural progression on both parts.

We hope your time with us is both relaxing and enjoyable.

We endeavour to provide the highest standard of customer service in our beauty clinic by using only the finest products, employing attentive professional people and offering an environment that is truly customer focused and most definitely user friendly.

## **Discover the Benefits of LED Phototherapy with Dermalux**

LED Phototherapy is a non-invasive medical treatment that uses light-emitting diodes (LEDs) to stimulate cellular activity and promote skin rejuvenation.

Different wavelengths of light, typically red, blue, and near-infrared, are utilized to target specific skin concerns.

Red light stimulates collagen production, reduces inflammation, and promotes overall skin health.

Blue light is effective in treating acne by targeting the bacteria responsible for breakouts.

Near-infrared light penetrates deeper into the skin, promoting healing and enhancing cellular regeneration.

LED Phototherapy is known for its safety, minimal side effects, and versatility in addressing various skin conditions. It is commonly used in dermatology and aesthetic settings for its ability to improve the appearance of the skin, reduce fine lines and wrinkles, and treat conditions such as acne and hyperpigmentation.

- Stimulates Collagen
- Reduces Inflammation
- Promotes Healing
- Treats Acne
- Enhances Skin Tone
- Boosts Circulation
- Minimises Pore Size

## **For Skin rejuvenation / glow**
